Description

STEIN Fixed Vice 125mm: Precision and Stability in Every Project

The **STEIN Fixed Vice 125mm** is the indispensable tool for those seeking precision and stability in their industrial work. Designed to offer superior performance, this vice becomes the perfect ally for professionals who demand quality and durability in their work tools.

Manufactured with a **cast steel body**, the STEIN Vice guarantees exceptional strength, withstanding intensive use without compromising its integrity. This feature not only prolongs the life of the product, but also ensures a firm and secure tightening, essential for carrying out work with maximum precision.

One of the most notable advantages of this vice is its ability to be **secured to the table using screws**. This design allows for a solid fixation, avoiding unwanted movements during use. The stability it offers is crucial for carrying out tasks that require a high degree of accuracy, such as assembling parts or working with delicate materials.

The **125mm jaw width** is ideal for a wide range of industrial applications. This measurement provides the versatility needed to hold different types of materials, from metals to wood, with total security. In addition, the professional tightening offered by this vice ensures that each piece is kept in place, making the user's work easier and improving efficiency in each project.

In short, the STEIN Fixed 125mm Vice is a smart investment for any workshop or industry that values quality and precision. Its robust construction, together with its functional design, make it an essential tool for those looking for professional results in every task. With the STEIN Vice, every project is carried out with the confidence of having a tool that not only meets, but exceeds expectations.

Specifications

High	11, 00
Width	13, 00
