

Product sheet

Rubi cross-linked polyethylene float, 22.5x12 cm tip

Brand: RUBI

Reference: SCO 39308

RUBI has a wide range of trowels for mortar plastering. Within this range, the specialised professional can find cross-linked polyethylene trowels. Due to their low weight, these trowels are ideal for vertical and high-rise work. Cross-linked polyethylene trowels are suitable for any surface size and provide maximum lightness and wear resistance. With very low water absorption, less than 1%, their dimensional stability is guaranteed. RUBI cross-linked polyethylene trowels are available in two formats: rectangular and pointed. The rectangular format is the most common and is used for large surfaces. The pointed format is useful when we find corners that are difficult to access. The handles of RUBI cross-linked polyethylene trowels have been carefully designed to offer the best relationship between comfort and manoeuvrability, to allow the professional to reach any area with the greatest ease and comfort. For final troweling of mortar plastering. Maximum lightness and wear resistance. Very low water absorption. Guarantees dimensional stability.
