ZOTAL Rodenticide paste 150g

Brand: ZOTAL

Reference: SCO 91762

ZYNRAT® BF Fresh Paste Blue ZYNRAT® BF Fresh Paste is a ready-to-use paste bait in 15 g sachets for the control of common mice and brown or sewer rats at all stages of development. Description ZYNRAT® BF Fresh Paste is a ready-to-use paste rodenticide and rodenticide in 15 g sachets. This product is developed for the control of common mice and brown or sewer rats at all stages of development. It contains a second-generation anticoagulant active ingredient, brodifacoum, which is active upon single ingestion. Thanks to the mode of action of this rodenticide, the death of rodents occurs without arousing suspicion towards the bait by other members of the colony. Characteristics ZYNRAT® BF Fresh Paste rodenticide has the following innovative and patented characteristics: FLUO-NP® technology: thanks to a fluorescent pigment technology, the bait can be easily identified even in low light conditions. PASTA PLUS®: patented formulation that combines a well-balanced mixture of food-derived components such as milk flour, sugar and the fortified rodent fats mentioned above. ZYNRAT® BF Pasta Fresca is a rodenticide that incorporates a bitter-tasting substance (Denatonium Benzoate). In this way, it prevents accidental ingestion by non-target animals. Application Common mouse: bait stations with 50 g of product every 5 metres (every 2 metres in areas of high infestation). Check bait stations every 2/3 days at the beginning and at least once a week thereafter. Brown rat: bait stations with 90 g of product every 10 metres (every 5 metres in areas of high infestation). Check bait stations every 5/7 days at the beginning and at least once a week thereafter. Additional information Composition Brodifacoum 0.0029%, Excipients csp 100%
