Compression connector straight link 20

Brand: NORMA

Reference: ALM 2033.0150

20mm straight link compression connector designed for high pressure systems. Made of resistant materials, it supports a maximum working pressure of 16 bar. Ideal for industrial and domestic applications that require secure and durable connections. Easy to install, it guarantees a reliable seal in hydraulic and pneumatic systems. Compatible with various types of pipes.

Description

The 20mm straight link compression connector is the perfect solution for high pressure systems that require secure and long lasting connections. Made from heavy duty materials, this connector can withstand a maximum working pressure of 16 bar, making it ideal for industrial and domestic applications.

Its straight link design makes it easy to install, ensuring a reliable seal in hydraulic and pneumatic systems. Plus, its compatibility with various types of pipe makes it a versatile and convenient choice for a wide range of applications.

With this compression connector, you can be sure that your connections will be secure and leak free, thanks to its robust and reliable design. Whether in demanding industrial environments or domestic applications, this connector will give you peace of mind that your systems are running efficiently and safely.

Don't take chances with unsafe connections, choose the 20mm straight link compression connector to ensure the quality and durability of your piping systems.

Specifications

Colour	Black
EAN	9555694205077
Material	Polímero

Measures	20mm
