Description

The Steelpro 2188PSSIN/U welding helmet is the ideal protective equipment for workers working in workshops, shipyards, metal industry and maintenance. Its flip-up shade 11 visor ensures a clear and protected view during the welding process, while its adjustable harness with screw lock ensures a comfortable and secure fit for any user.

Made of high temperature, impact and chemical resistant polypropylene, this welding helmet offers exceptional durability in demanding work environments. Its ergonomic design prevents the accumulation of incandescent residues, providing greater safety and comfort to the user.

In addition, the helmet includes a shade 11 welding glass and a 108x51 mm filter cover, ensuring optimal protection during welding. With the Steelpro 2188PSSIN/U welding helmet, workers can carry out their tasks with complete peace of mind and safety, knowing that they have high quality and performance protective equipment.
