Description

The 3/8" float valve model 8102 is the perfect solution for maintaining efficient control of the water level in cisterns. Made from durable materials, this valve guarantees strength and a long life, making it a long-lasting and reliable investment.

Its easy-to-install design makes it ideal for use in domestic or industrial cisterns, and its compatibility with standard systems makes it a versatile and convenient option. With this float valve, you can be sure that your cistern will function optimally, avoiding leaks or water waste.

Thanks to its precision in filling, this float valve helps maintain a constant and adequate water level in the cistern, which in turn contributes to a more efficient use of the water resource. With the 3/8" float valve model 8102, you can rest easy knowing that your cistern is in good hands and working optimally at all times.
