Description

The 200-gram MIARCO tow skein is the perfect ally to ensure tightness in joints and threaded connections of metal or plastic pipes. Made of 100% refined carded linen, this tow is compatible with joint pastes and improves pressure resistance in threaded metal fittings, ensuring a secure and long-lasting connection.

Its versatility and effectiveness make it an essential product for plumbing and piping applications, offering an optimal seal and preventing possible liquid leaks. With the MIARCO tow skein, you can be sure that your installations will be protected and will operate efficiently.

In addition, its presentation in a 200-gram skein provides you with the perfect amount for your projects, avoiding waste and making it easy to use. Do not miss the opportunity to have a quality product with superior performance such as the MIARCO tow skein, your best ally in plumbing and piping work.
