Description

For installation requires control device

See installation diagram of the shutter to command

The series **Simon 27** is one of the series Simon mechanisms more versatile and colorful. It has a wide range of frames and interchangeable covers for optimum adaptation to the needs of each project.

Although the different variants of the series, the mechanism is shared, the frames have a wide range of possibilities.

On the one hand is the **Simon 27** classic series, with intermediate frames and external trim, of more rounded finish.

Then there are frames **Simon 27 series NEOS**, frames finishes matt or polished glass, with soft and bold colors giving it a completely different appearance classic series.

And finally the range **play** that changes the appearance of the frames, available in two colors, white and ivory, but with many interchangeable covers the simplest to the most bold and unrestrained.
