Description

The 750 ml polyurethane foam with application nozzle is a versatile product that combines easy adhesion, fixing, sealing, filling, and waterproofing properties with excellent thermal, acoustic, and electrical insulation. Its high expansion capacity and compatibility with most construction materials make it the ideal choice for protecting and insulating ventilation and air conditioning systems, filling air chambers, enclosures, pipe grommets, and gaps in boat hulls, securing lightweight panels, fences, and door and window frames, among other uses. It also absorbs vibrations and movement between materials and, once hardened, is resistant to water and chemicals. Once dry, it can be cut, sanded, polished, and painted, making it even more versatile and functional.

Specifications

Colour	Yellow
EAN	8435450470097
Material	Polyurethane
Measures	750ml
Weight (kg)	0,866
