Description

The Analog Plug-in Timer (16A 240V IP20) with safety shutter is a device designed to offer greater protection against accidental contact. With a 24-hour program and a minimum switching interval of 15 minutes, this timer provides additional safety thanks to the plastic plates that cover the plug contacts. Its simple operation allows you to program up to 96 on and off times per day, making it ideal for controlling automatic lighting, electrical appliances, aquariums, gardening devices, alarm systems, among others. Also known as a mechanical timer, electrical time control, automatic switch, programmable plug, among other names, this analog timer is a versatile and safe tool for automating electrical tasks at home or at work.

Specifications
