The 115mm Double-Crown Segmented Diamond Disc is a high-quality tool designed for sanding and grinding uneven concrete, marble, granite, and stone surfaces. Featuring a double-row structure of 20 robust and durable blades, this disc provides a smooth, improved finish, ideal for polishing and cleaning. Its five cooling holes maintain optimal temperature during prolonged work, increasing its durability and lifespan. It also reduces the dust generated during grinding, improving visibility and safety in the workplace. Perfect for working on a variety of surfaces, this disc is ideal for removing layers of paint, protrusions, impurities, adhesives, and other substances, ensuring precise work without damaging the underlying surface. A versatile and efficient product for demanding professionals.
