Description

The 301RP/80 deadbolt is a security device designed to provide a high level of protection for residential and commercial access points. With a robust and functional design, this deadbolt allows manual opening from the inside using a button, while the outside is accessed via a key, thus ensuring security without compromising ease of use.

- Case dimensions: 83 mm x 85 mm.
- Case material: Brass plated, offering corrosion resistance and durability.
- Steel bars with a diameter of 18 mm, which provide greater resistance to prying.
- Round security cylinder with a diameter of 30 mm and a length of 50 mm, designed to prevent tampering.
- Manual opening from the inside, making it easy to use in everyday situations.

This deadbolt is a reliable choice for those looking for a security system that combines functionality and resistance, adapting to a variety of protection needs. Its design allows for simple installation and effective operation, ensuring peace of mind for the user.
