Description

The 150 mm galvanized exhaust hood is a device designed to optimize ventilation in air extraction systems. Its galvanized steel construction ensures corrosion resistance and durability, making it a suitable choice for a variety of industrial and commercial applications. This hood allows for efficient air evacuation, helping to maintain a healthy and pollutant-free environment.

- **Material:** Galvanized steel, corrosion resistant.
- **Diameter:** 150 mm, compatible with standard extraction systems.
- **Design:** Aerodynamic, promotes air circulation and minimizes resistance.
- **Installation:** Easy to install in ventilation ducts, without the need for specialized tools.
- **Use:** Suitable for applications in kitchens, workshops and other areas that require efficient ventilation.
- **Resistance:** Withstands high temperatures and adverse environmental conditions.
