Description

0.7mm galvanized wire is a versatile and strong material used in a variety of construction, gardening, and craft applications. Weighing 500 grams, this roll of wire is designed to offer durability and excellent corrosion protection, thanks to its zinc coating. Its flexibility allows for easy handling and adaptation to different needs, making it easy to use in both professional and personal projects.

- Diameter: 0.7 mm
- Weight: 500 grams
- Material: Galvanized steel
- Corrosion resistance: High, due to the zinc coating
- Flexibility: Allows easy handling and adaptation to different shapes
- Applications: Construction, gardening, crafts, and general projects
