Description

The 156 AP 60 DCH B/REDONDO CVL lock is a security device designed to offer a high level of protection and durability for access doors. Its robust and efficient construction makes it a reliable choice for those seeking security without compromising functionality. This model stands out for its rounded design, which blends harmoniously into various architectural styles.

- Lock type: Mortise lock with double lever system.
- Dimensions: 60 mm deep, adapting to most standard doors.
- Handle: Compatible with round-type handles, making it easy to install in different configurations.
- Material: Made of high-strength steel, which guarantees a long life and resistance to wear.
- Finish: It has a chrome finish, which not only provides a modern look, but also improves its resistance to corrosion.
- Installation: Simple installation system that allows for quick and efficient assembly.
- Certification: Complies with current safety regulations, ensuring an adequate level of protection.
