Description

The Masso 231402 fruit fly and wasp trap is an effective and practical solution for controlling a variety of insects, including flies, wasps, hornets, and black grouse. Its innovative design allows it to efficiently trap these insects, ensuring a more pleasant environment in indoor and outdoor spaces.

- Funnel design that facilitates the entry of insects and prevents their exit.
- Operations based on an attractant liquid that causes the trapped insects to drown.
- It can be placed on flat surfaces or suspended, adapting to different environments.
- Versatile use indoors and outdoors, including areas such as gardens, terraces, porches and swimming pools.
- Robust construction that ensures durability in various weather conditions.
- Easy to clean and reuse, which contributes to simple maintenance.
- Compact design that allows for aesthetic integration into the environment where it is used.
