Description

The Polminor Matabi duster is a manual device designed for the precise application of powdered products, such as diatomaceous earth and other phytosanitary products. With a 2-liter capacity, this duster combines functionality and ergonomics, making it easy to use in a variety of gardening and agricultural tasks.

- 2-liter capacity, suitable for prolonged applications without the need for frequent refills.
- Manual bellows design that allows effective control of the amount of product dispensed.
- Adjustable outlet tube that facilitates the direction of the powder flow, optimizing coverage in specific areas.
- Adjustable diffuser to customize the product dispersion according to the user's needs.
- Wide filling mouth that simplifies the process of filling and emptying the tank, minimizing spills.
- Lightweight construction that allows comfortable handling during prolonged use.
- Compatible with products of natural origin, making it suitable for those who prefer ecological solutions in their gardening practices.
