Box 50 Rocker Arm Stud M5 Index

Brand: INDEX

Reference: ALM 3173.0161

The rocker arm with M5 stud is designed to provide efficient support in applications requiring stability and flexibility. Its tilting anchor system allows for precise adaptation to different surfaces, ensuring optimal performance in industrial and construction environments. Ideal for projects requiring robustness and durability.

Description

The Index 50-pack of rocker arms with M5 studs is designed to provide an efficient solution for applications requiring a precise clamping and adjustment system. This product is especially useful in industrial and manufacturing environments, where strength and durability are essential. Its design allows for easy installation and reliable operation, ensuring optimal performance in a variety of working conditions.

- **Material:** Made of high-strength steel to ensure durability and wear resistance.
- **Dimensions:** M5 stud, suitable for a variety of fastening applications.
- **Fastening Type:** Rocker arm allowing for quick and easy adjustment.
- **Load Capacity:** Designed to support moderate loads, ideal for use in assemblies and light structures.
- **Finish:** Surface treatment that provides corrosion resistance and improves product longevity.
- **Compatibility:** Compatible with a wide range of fixing components and systems on the market.
