Description

The JMA SR48 Rolling Code Fixed Copy Remote Control is a device designed for copying remote controls, offering a versatile and efficient solution for managing multiple frequencies. This model stands out for its ability to operate with both fixed and rolling codes, facilitating the duplication of remote controls of various brands and models without the need for additional devices.

- Capacity for copying by confrontation, eliminating the need for external hardware.
- Supports the duplication of fixed and rolling codes in a single remote control.
- It has 4 buttons, each with the possibility of programming 2 different frequencies.
- It incorporates an innovative Scanner system, which allows the copying of signals from busy receivers.
- Connectable to a PC for use with JMARemotesPro software, facilitating the management and programming of codes.
- Compatible with frequencies of 433.92 MHz and 868 MHz, expanding its versatility in the market.
