Description

The JMA SR4V Rolling Code Fixed Copy Remote Control is a high-tech device designed to copy remote controls, both fixed and rolling codes, all in a single remote control. This product is a versatile and efficient solution that allows signal duplication without the need for additional devices, facilitating access to multiple remote control systems.

- Copy by confrontation: Allows duplication of remote controls without the need for external devices.
- Copy of Fixed and Rolling Code: Functionality to work with both types of codes in a single remote control.
- Various frequencies: Ability to operate on two different frequencies on any of the four buttons.
- Scanner System: Innovative function that allows the copying of busy receivers, optimizing the efficiency of the process.
- PC connection: Possibility of connecting to a computer to work with the JMARemotesPro software, facilitating the management of copies and configurations.
- Compatible frequencies: Operation on frequencies of 433.92 MHz and from 220 MHz to 420 MHz, applicable outside the EU.
