Description

The SEG Antibumping brass cylinder, 60 mm long, is a security device designed to offer advanced protection against common burglary techniques. This model, reference RK 23237, is made with high-quality materials that guarantee its durability and resistance under various conditions. Its design incorporates multiple features that reinforce the security of doors and access points.

- Antibumping: Prevents the bumping technique, which allows locks to be opened using controlled impacts.
- Anti-drill: Resists opening attempts using drills, making unauthorized access difficult.
- Anti-break: Designed to prevent the cylinder from breaking, maintaining the integrity of the lock.
- Anti-lock: Protects against the use of lock picks, ensuring effective closing against improper manipulation.
- 12 active pins: It has a 12-pin system that increases the complexity of the key, improving overall security.
- JMA KAE-12D key: Includes a high-precision key, designed to optimize the functionality and security of the cylinder.

This cylinder is a reliable option for those looking to reinforce the security of their spaces, combining advanced technology and a design Robust and adaptable to different door types. Its installation is simple, allowing for quick implementation without compromising security.
