Description

The Bellota 8251-350 chisel and guard is a tool designed to offer superior performance in drilling and cutting jobs in hard materials. Manufactured with top-quality steel, this product stands out for its strength and durability, thanks to an induction hardening and integral annealing process. Its construction guarantees a long service life, even under conditions of intensive use.

- Material: High-quality steel with specialized heat treatment.
- Manufacturing process: Induction hardening and integral annealing for greater resistance.
- Differentiated heat treatment in three sections: head, tip, and body, optimizing performance in each area.
- Dimensions: Precise specifications for comfortable and efficient handling.
- Applications: Designed for drilling and cutting in hard materials, guaranteeing efficiency in demanding jobs.
