Niagara low cistern flusher with double push button

Brand: SCOA

Reference: SCO 18760

The Niagara low-cylinder flusher with dual actuators is designed to optimize performance in flushing systems. Its robust construction ensures durability and efficiency, allowing for reliable operation in a variety of applications. Ideal for environments requiring effective fluid handling solutions.

Description

The low-flow cistern flushing system is designed to maximize water efficiency, especially in installations seeking a balance between sustainability and performance. This mechanism stands out for its design, allowing for the selection of two flush volumes, facilitating a more responsible use of water resources. Its robust structure ensures a long lifespan, capable of withstanding the wear and tear associated with intensive use. The technology employed in its manufacture allows for smooth, uninterrupted operation, essential in environments where reliability is paramount. This type of system adapts to different toilet configurations, offering a versatile solution for residential and commercial spaces. The integration of high-quality components ensures not only optimal performance but also reduced maintenance, resulting in a satisfactory user experience. In terms of installation, its design facilitates simple assembly, allowing for a streamlined and hassle-free process, making it a preferred choice for those seeking both functionality and aesthetics in their plumbing installations.
