

Product sheet

Acesa conical knobs 892 6x130 mm

Brand: SCOA

Reference: SCO 31061

ACESA's tapered pin punches are designed to provide precise and efficient holding in a variety of industrial applications. Their robust construction ensures durability and strength, while their ergonomic design makes them easy to handle, optimizing work processes in demanding environments. Ideal for tasks requiring reliability and precision.

Description

Tapered drift pins from the aforementioned brand are essential tools in the industrial field, distinguished by their ability to provide a firm and precise hold in a variety of applications. Their robust design not only ensures a long service life under demanding working conditions but also allows for consistent performance, minimizing the risk of failure during use. The ergonomics incorporated into their structure facilitate handling, resulting in greater efficiency and comfort for the operator. This type of tool is particularly valued in sectors where precision is crucial, as their conical shape allows for optimal alignment and easy insertion into different materials. Furthermore, their versatility makes them suitable for a wide range of tasks, from assemblies to fine adjustments, making them an indispensable resource in workshops and factories. The combination of their technical design and the quality of the materials used in their manufacture ensure that these drift pins remain up to market demands, offering effective solutions for daily challenges in the professional field.
