Sifer socket wrench, blued, magnet drill, 8x48 mm

Brand: SCOA

Reference: SCO 95643

Blackened steel socket wrench designed for use with drills, ideal for applications requiring precision and durability. Its built-in magnet ensures a firm grip on nuts and bolts, making it easier to work in tight spaces. Its compact size makes it versatile for a variety of mechanical and maintenance tasks.

Description

The tool is made of blackened steel, giving it remarkable resistance to corrosion and wear, ensuring optimal performance over time. Its design is perfectly suited to the demands of precision work, making it especially useful in environments where space limitations can be a challenge. The inclusion of a magnet in its structure allows for secure gripping of metal parts, minimizing the risk of falls or slipping during use. This feature is essential for those working on mechanical or maintenance projects where efficiency and accuracy are paramount. Its 48 mm length makes it easier to access difficult areas, providing the ability to operate at difficult angles without compromising effectiveness. This tool is ideal for professionals looking to optimize their work, as well as for mechanical enthusiasts who value quality and functionality in their tools. The combination of its durable material and ingenious design makes it a reliable choice for a wide variety of applications.
