Handle and Rosette Set, GIBALTO

Brand: GIBALTO

Reference: GIB 014659

This assembly is designed for use in advanced plumbing systems, offering precise and efficient control. Its compatibility with DN16 and DN20 multi-layer press-fit connections ensures a secure and durable installation, and it fits perfectly with built-in ball valves for optimal performance.

Description

The handle and rosette assembly is an essential component for plumbing systems that require a secure and efficient connection. Designed to integrate seamlessly with concealed ball valves, this assembly ensures precise and reliable water flow control in domestic or commercial installations. Its robust and functional design ensures a long life and optimal performance under various operating conditions.

- **Compatibility:** Specifically designed for built-in ball valves with multi-layer press-fit connection DN16 and DN20.
- **Materials:** Made of high-quality materials that offer corrosion resistance and durability.
- **Design:** The rosette provides an aesthetic and professional finish, hiding the connections and offering a clean and tidy appearance.
- **Installation:** Easy to install, with a mounting system that allows for a secure and stable fixation.
- **Functionality:** The handle allows ergonomic and comfortable handling, making it easy to control the water flow with precision.
- **Size compatibility:** Suitable for piping systems with nominal diameters of DN16 and DN20, ensuring perfect integration into existing installations.
- **Resistance:** Able to withstand standard working pressures in plumbing systems, guaranteeing performance reliable.
