Description

The **Flutec Universal Dual Flush Valve** is an efficient and versatile solution for toilet flushing systems. This device is designed to offer optimal performance, combining functionality and water savings. Its adjustable dual flush allows you to select between 3 and 6 liters, adapting to the specific needs of each user. It also features a height-adjustable overflow that prevents flooding, ensuring safe and efficient use.

Made with SS304 stainless steel cable, the Flutec ensures durability and corrosion resistance, resulting in long-lasting operation without the need for maintenance. Its 360° rotation provides installation flexibility, allowing for precise adjustments in any direction.

This flush valve is compatible with universal diameters, making it easy to integrate into most standard cisterns.

- Adjustable dual flush: 3L/6L to optimize water consumption.
- Height-adjustable overflow: adjustable anti-flood system.
- SS304 stainless steel cable: high durability and corrosion resistance.
- 360° rotation: installation flexibility.
- Maintenance-free: designed for long-term use.
- Multiple positions: adapts to various cistern configurations.
- Quick installation: simple and efficient assembly.
- Water saving: contributes to water conservation.
- Universal diameter: compatible with most standard cisterns.
- Includes base and seat gasket: for a secure seal and cash.
