Description

The **Flutec Universal Dual Flush Valve** is an efficient and versatile solution for toilet flushing systems. Designed for optimal performance, this device combines functionality and water savings, adapting to various installation configurations thanks to its universal design. Its adjustable dual flush allows you to select between 3 and 6 liters, optimizing water consumption according to the user's needs. It also features a height-adjustable overflow with an anti-flood system, preventing overflows and ensuring safe use.

Made with SS304 stainless steel cable, the flush valve ensures durability and corrosion resistance, resulting in long-lasting and reliable operation. Its 360° rotation offers installation flexibility, allowing the mechanism to be adjusted to the available space. This device requires no maintenance, reducing costs and intervention time. Its design allows for multiple positions, adapting to different cistern configurations, and its installation is quick and easy, facilitating efficient assembly.

- Adjustable dual flush: 3L/6L
- Height-adjustable anti-flood overflow
- SS304 stainless steel cable
- 360° rotation
- Maintenance-free
- Multiple positions
- Quick installation
- Water saving
- Universal diameter

- Includes base and seat gasket
