Description

The LED light and temperature sensor aerator filter is an innovative device that transforms the experience of using faucets at home. This product not only regulates water flow but also provides visual information about the water temperature through an LED light system. Its universal design allows it to adapt to a wide variety of faucets, offering a practical and efficient solution for any space. Upon detecting the water temperature, the aerator changes color, providing an immediate visual reference that enhances safety and comfort during use.

- **Temperature Detection:** Changes color according to the water temperature, offering a clear visual reference.
- **Universal Compatibility:** Designed to fit most standard faucets, making installation easy.
- **LED Lighting:** LED lights enhance visibility in low-light conditions and indicate the temperature.
- **Battery-Free Operation:** Uses the energy from the water flow to power the LED lights, eliminating the need for batteries.
- **ABS Material:** Made of high-quality ABS material, ensuring durability and resistance to daily wear and tear.

Specifications

EAN	8432453147889
Material	ABS
