Click-clack valve sealing rubber, LOGUI

Brand: LOGUI

Reference: GIB 002515

Specialized rubber for the effective sealing of click-clack valves, contributing to optimal performance and increased system durability. Its construction with high-quality materials ensures a precise fit, making it suitable for demanding environments requiring high levels of reliability and efficiency.

Description

Click-clack valve sealing rubber is an essential component designed to ensure a tight seal in drainage systems. This product is essential for the proper functioning of click-clack valves, ensuring that water does not leak when the valve is closed. Made from high-quality materials, this rubber offers durability and wear resistance, ensuring optimal performance over time.

- Material: Heavy-duty rubber, designed to withstand continuous use and exposure to water.
- Compatibility: Compatible with most standard click-clack valves on the market.
- Diameter: Designed to fit valves with a specific diameter, ensuring a precise fit.
- Temperature resistance: Able to withstand extreme temperatures, both hot and cold, without losing its shape or functionality.
- Easy installation: Can be easily installed without the need for specialized tools.
- Durability: Offers a long life thanks to its resistance to wear and deformation.
- Color: Available in black, allowing for discreet integration into any drainage system.

Specifications

EAN	8432453025156
Material	Goma
