Description

The 1" Sliding Guide Rod Float Valve is an efficient and durable solution for water level control systems. Designed for optimal performance, this component is suitable for a variety of applications in plumbing and water storage systems. Its robust construction and high-quality materials ensure a long life and reliable operation.

- Sliding Guide Rod: Provides precise water level control, ensuring smooth and efficient operation.
- Various Sizes: Available in various sizes to suit different installation needs and configurations.
- Dimensions: 300mm x 35mm x 70mm, allowing for versatile installation in a variety of environments.
- Made of Brass: Known for its corrosion resistance and durability, this material is ideal for applications involving contact with water.
- EAN13 Code: 8432453024098, for easy identification and inventory management.
