Description

The float valve with sliding guide rod is an efficient and durable solution for water level control systems. Designed for optimal performance, this component is suitable for a variety of applications in plumbing and water storage systems.

- Sliding guide rod: Allows precise and smooth adjustment of the water level, ensuring efficient and uninterrupted operation.
- Various sizes: Available in various sizes to suit different installation needs and configurations.
- Dimensions: 300mm x 35mm x 70mm, providing a compact and manageable size for easy integration into existing systems.
- Made of brass: Corrosion-resistant material that ensures a long life and reliable performance under demanding conditions.
- 1/2" connection: Compatible with most standard plumbing systems, making it easy to install and maintain.
