Description

The float valve with round rod guide is an efficient solution for automatic filling of toilet tanks. Designed to deliver reliable performance, this component is essential for the proper functioning of the toilet water filling system, ensuring a constant and controlled flow.

- Round rod: The structure of the rod is round, making it easy to install and adjust inside the tank.
- Different sizes: Available in various sizes to adapt to different types of tanks and specific needs.
- Dimensions: 300 mm x 35 mm x 70 mm, providing a compact size that integrates easily into most WC systems.
- Made of brass: The brass material guarantees durability and corrosion resistance, prolonging the life of the float valve.
- 1 1/4" - 9/100 thread: The standard thread allows for a secure and stable connection, ensuring a tight seal to prevent leaks.
