Description

The round rod guide float valve is an efficient solution for automatic toilet tank filling. Designed to offer reliable performance, this component is essential for the correct operation of the toilet water filling system.

- Round rod: Provides stability and a precise fit in the filling mechanism.
- Different sizes: Available in various sizes to adapt to different types of tanks.
- Dimensions: 300mm x 35mm x 70mm, which ensures a proper fit in most standard systems.
- Made of brass: Corrosion-resistant material that guarantees durability and long-lasting performance.
- M6 thread: Compatible with standard 1/2" connections, facilitating its installation in existing systems.
