Description

The round rod guide float valve is designed for automatic filling of toilet tanks, offering an efficient and durable solution for controlling the water level. This component is essential to ensure optimal and uninterrupted operation of the flushing system.

- Round rod: Provides stability and a precise fit inside the tank.
- Different sizes: Adapts to various tank configurations, ensuring versatility in its installation.
- Dimensions: 300mm x 35mm x 70mm, allowing proper integration into standard WC tank spaces.
- Made of brass: Material that guarantees corrosion resistance and a long service life, even in high humidity conditions.
