Description

The round rod guide float valve is an efficient solution for automatic toilet tank filling. Designed for reliable performance, this component is essential for the proper functioning of the toilet water filling system. Its robust construction and high-quality materials ensure a long life and trouble-free operation.

- Round rod for a precise and secure fit.
- Available in different sizes to suit a variety of needs.
- Product dimensions: 300mm x 35mm x 70mm.
- Made of brass, which guarantees corrosion resistance and durability.
- M6 connection thread for quick and easy installation.
- 3/4" connection diameter for compatibility with most plumbing systems.
