Description

The Flutec bottom float valve is an efficient and durable solution for controlling the water level in low-level cisterns. Designed for optimal performance, this universal model adapts to various installation configurations, ensuring fast and quiet filling. Its 3/8" brass fitting ensures a robust and reliable connection, while its ability to operate within a pressure range of 0.2 to 10 BAR, with maximum peaks up to 21 BAR, makes it a versatile and durable option.

- **3/8" Brass Fitting:** Robust and reliable connection.
- **Operating Pressure:** Operates within a range of 0.2 to 10 BAR.
- **Maximum Peaks:** Withstands up to 21 BAR.
- **Durable Construction:** Materials that prevent deterioration.
- **Float with Protection System:** Prevents failures and ensures continuous operation.
- **Height-Adjustable Float:** Allows you to adjust the water level according to specific needs.
- **Universal Model:** Compatible with A wide range of low-tank cisterns.
- **Fast and quiet filling:** Minimizes noise during operation.
