Description

The Flutec side float valve is an efficient and durable solution for controlling the water level in low-tank cisterns. Designed for optimal performance, this universal model adapts to various needs thanks to its advanced technical features. Its 3/8" brass fitting ensures a secure and robust connection, while its ability to operate within a pressure range of 0.2 to 10 BAR, withstanding peak pressures of up to 21 BAR, makes it a reliable choice for various environments. Furthermore, its corrosion-resistant construction ensures a long service life, making it ideal for extended use.

- **3/8" Brass Fitting:** ensures a secure and robust connection.
- **Operating Pressure:** operates within a range of 0.2 to 10 BAR.
- **Peak Pressure:** withstands up to 21 BAR.
- **Corrosion Resistance:** built to ensure a long service life.
- **Float with Safety System:** for safe operation.
- **Height-Adjustable Float:** allows you to adjust the water level according to specific needs.
- **Universal model:** compatible with a wide variety of low-tank cisterns.
- **Fast and quiet filling:** improves efficiency and reduces noise during operation.

Specifications

EAN	8432453148220
Material	Latón
Thread	3/8"
