### Description

The extendable and angled toilet connection sleeve is a technical solution designed to facilitate the installation of toilets in spaces where flexibility and adaptability are required. This component is essential to ensure a safe and efficient connection between the toilet and the drainage system, allowing precise adjustments in complex installations.

- 90° angled design for optimal connection to the toilet.
- Made of polypropylene (PP), a material known for its strength and durability.
- Extendable, with an adjustment range of 340 to 660 mm, allowing it to adapt to different installation configurations.
- Equipped with a rubber lip to ensure a tight seal and prevent leaks.
- Compatible with outlets with a diameter between 80 and 110 mm, offering versatility in its application.
