## Sampling Sleeve - High Quality, Durable, DISMOL

Brand: DISMOL

Reference: GIB 001436

Sleeve designed for heating systems and sealed gas boilers, made of aluminum with silicone seals. It withstands temperatures up to 200°C, offering a robust structure that ensures optimal performance in demanding environments, contributing to durability and efficiency in sample collection.

### Description

The sampling sleeve is an essential component designed to facilitate sample collection from sealed gas boilers and heating systems. Its robust construction and high-quality materials ensure long-lasting, reliable performance in demanding environments.

- Inner diameter: 60 mm, outer diameter: 100 mm
- Manufactured from high-strength aluminum
- Extruded and die-cast aluminum for durability
- Fitted with silicone gaskets for optimal sealing
- Duct wall thickness: 1 mm
- Able to withstand temperatures up to 200°C
- Specially designed for use on sealed gas boilers and heaters
