Internal Click-Clack Valve Mechanism, LOGUI

Brand: LOGUI

Reference: GIB 002608

An internal click-clack valve mechanism ensures efficient, tight closure and optimal performance. Its durable construction provides reliable performance in drainage systems, adapting to different bathroom configurations and contributing to the functionality and aesthetics of contemporary installations.

Description

The internal mechanism for large external plug click-clack valves is an efficient and practical solution for controlling water flow in washbasins and sinks. Designed to offer optimal performance, this mechanism guarantees smooth and long-lasting operation, adapting to the needs of modern and traditional installations.

- **Compatibility:** Specifically designed for click-clack valves with a large outer plug, ensuring a precise and secure fit.
- **Material:** Made of high-quality materials that resist corrosion and wear, prolonging the life of the product.
- **Operation:** Pressure-to-open and close system, allowing simple and efficient control of water flow.
- **Installation:** Simple installation process, compatible with most standard plumbing systems.
- **Maintenance:** Design that provides easy access for cleaning and maintenance, ensuring consistent performance.
- **Dimensions:** Adapted to fit standard-sized valves, ensuring seamless integration into different configurations sink.
