Description

The extendable curved siphon with horizontal outlet and auxiliary inlet is an efficient solution for installing drainage systems in residential and commercial spaces. Designed for flexibility and adaptability, this siphon fits various plumbing configurations, ensuring optimal and unobstructed water flow. Its bottle-type design allows for precise adjustments to suit the space, facilitating installation in different environments.

- **Extendable bottle-type trap**, allowing for precise adjustments to suit the space.
- **40 mm horizontal outlet**, suitable for standard connections in drainage systems.
- **32 mm reducer**, facilitating connection with pipes of different diameters.
- **1 1/2" fitting**, ensuring a secure and stable connection with other plumbing system components.
- **Auxiliary outlet**, allowing for the integration of additional devices or secondary drainage systems.
- **Detailed measurements** in the image, providing precise information for correct installation.
- **High-quality materials**, guaranteeing durability and corrosion resistance.
- **Compact design**, ideal for small spaces where optimization is required.
- **Easy installation**, suitable for both professionals and DIY enthusiasts.
- **Compatible with various configurations**, adapting to different plumbing systems.
