Description

The extendable double curved trap is an efficient solution for drain management in plumbing installations. Designed for versatility and adaptability, this trap features its extendable structure and ability to integrate into different pipe configurations. Its curved design allows for easy installation and optimized water flow, minimizing the risk of blockages.

- 40mm horizontal outlet: Provides a secure and efficient connection for the drain, ensuring a constant and uninterrupted flow.
- 32mm reducer: Allows adaptation to smaller diameter pipes, offering flexibility in installation and compatibility with various plumbing systems.
- 1"1/2 fittings: Guarantee a robust and stable connection, facilitating the assembly and disassembly of the siphon when necessary.
- Auxiliary socket: Offers an additional option to connect other devices or drainage systems, increasing the functionality of the siphon in complex environments.
