Product sheet

Simple Reducing Plug, IBIDE

Brand: IBIDE

Reference: GIB 003110

PVC connection element designed to facilitate the transition between diameters in piping systems. Its male-female configuration allows for efficient and secure installation, ensuring durability and resistance in plumbing and hydraulic applications. Ideal for optimizing performance in a variety of installations.

Description

The simple reducing plug is an essential component in piping systems, designed to facilitate the connection and reduction of diameters in plumbing installations and fluid conduction systems. Manufactured with high-quality materials, this accessory guarantees a secure and long-lasting connection.

- Material: PVC, known for its corrosion resistance and durability in various environmental conditions.
- Glued joint, which provides a firm and watertight connection, preventing leaks and ensuring the integrity of the system.
- Male type outlet, designed to fit perfectly into female connections, ensuring simple and efficient installation.
- Female type inlet, which allows easy integration with other components of the piping system.
