### Description

The angle valve is an essential component in plumbing installations, designed to control the flow of water in domestic and industrial systems. Manufactured with high-quality materials, this valve guarantees durability and optimal performance in various applications.

- Brass body: Provides corrosion resistance and a long service life.
- BS handle: Offers simple and efficient handling for flow control.
- PN 16: Capable of withstanding a nominal pressure of up to 16 bar, suitable for most plumbing applications.
- Chrome finish: Provides an aesthetic and modern appearance, as well as additional protection against wear.
- Male thread connection: Facilitates installation and ensures a secure and stable connection.
- Available in two sizes: 1/2" x 3/8", adapting to different installation needs.
