Brass Foot Valve - 2", GIBALTO

Brand: GIBALTO

Reference: GIB 002415

This brass device is ideal for water supply and irrigation systems. It features a stainless steel filter and a single-body design that optimizes performance. Its female-to-female threaded connection ensures a secure fit, adapting to a variety of industrial needs.

Description

The 2" brass foot valve is an essential component in water supply, industrial, and irrigation systems. Designed to ensure efficient and safe flow, this valve combines high-quality materials with a robust and functional design.

- **Brass body:** Made of high-strength brass, this valve offers durability and corrosion resistance, ensuring optimal performance in various conditions.
- **Stainless steel filter:** Incorporates a stainless steel filter that protects the system from impurities and particles, prolonging the life of the installation.
- **Single-body with guided flapper:** The single-body design with guided flapper provides a tight and efficient closure, minimizing pressure losses and improving system efficiency.
- **Available diameters:** Available in diameters ranging from 2" to 3", offering flexibility to adapt to different installation needs and configurations.
- **Female-female thread:** The female-female thread makes connection easy with other system components, ensuring a simple and secure installation.

Specifications

EAN	8432453002415
Material	Latón
