Description

The 1/2" check valve is an essential component in plumbing systems and industrial applications, designed to allow fluid flow in one direction only and prevent unwanted backflow. Manufactured from high-quality materials, this valve ensures durability and reliable performance under various operating conditions.

- **Body Material:** Brass, known for its corrosion resistance and durability.
- **Connection Type:** Female thread, facilitating simple and secure installation into existing systems.
- **Connection Size:** 1/2", compatible with a wide range of standard pipes and plumbing systems.
- **Main Function:** Allow unidirectional flow of fluids, preventing backflow that could cause damage or inefficiencies in the system.
- **EAN13 Code:** 8432453000160, for easy identification and inventory management.
