Description

The rubber elevator and terminal is an effective solution for controlling traffic speed in areas where safety is paramount. Designed to reduce vehicle speeds, this speed bump forces drivers to pay extra attention while driving, thus contributing to a safer environment.

- Manufacturing: Speed bumps made from pure rubber and recycled rubber, ensuring a robust and durable structure.
- Dimensions: Each speed bump measures 50x34.5x4.3 cm (Length x Width x Height), providing adequate coverage for the roadway.
- Material: The use of natural rubber offers greater resistance and prolongs the life of the product.
- Anti-slip: The surface of the speed bump is non-slip, improving safety for both vehicles and pedestrians.
- Coverage: Two pieces are required to cover one metre of roadway, ensuring a complete and effective installation.
- Terminals: Two terminals are required per speed bump for a proper and safe installation.
- EAN: 8432453072976

Specifications

EAN	8432453072976
Material	Goma
