Product sheet

Junkers heater injector, JUNKER.

Brand: JUNKER

Reference: GIB 012370

Injector designed to improve thermal performance in heating systems. Its construction with high-quality materials ensures durability and efficient heat transfer, offering precision and reliability in gas flow regulation for optimal operation.

Description

The Junkers heater injector, model 100205, is an essential component designed to optimize the performance of heating systems. This injector is made of high-quality materials that guarantee durability and efficiency in its operation. Its precise design allows for easy installation and a perfect fit in compatible heaters, ensuring adequate gas flow for optimal equipment operation.

- Model: 100205
- Compatibility: Specifically designed for Junkers heaters
- Material: Made of high-temperature resistant alloys
- Function: Optimizes gas flow for efficient performance
- Installation: Easy to install, with a precise fit
- Durability: High resistance to wear and corrosion
- Dimensions: Designed to fit perfectly into the heating system
- Certification: Meets safety and quality standards
