Product sheet

Junkers Temperature Limiter, JUNKER

Brand: JUNKER

Reference: GIB 004637

Safety device that regulates temperature in heating systems, ensuring safe and efficient operation. Its design allows for precise control, preventing overheating and contributing to the equipment's durability. It is suitable for a variety of applications in both domestic and commercial environments.

Description

The Junkers temperature limiter is an essential component for ensuring the safety and proper functioning of water heaters. Designed to act as a safety thermostat, this device limits the water temperature, ensuring it does not exceed 110°C. Its implementation is crucial to prevent overheating that could damage the system or pose a risk to users.

- **Main function:** Acts as a safety thermostat for water heaters.
- **Temperature range:** Limits the water temperature to a maximum of 110ºC.
- **Compatibility:** Specifically designed for Junkers heater systems.
- **Material:** Made with heat-resistant materials to ensure durability and reliability.
- **Installation:** Easy to install in existing systems, without the need for complex modifications.
- **Safety:** Prevents overheating, protecting both the equipment and users.
- **Dimensions:** Compact and lightweight, facilitating its integration into different heater models.
- **Certification:** Complies with current safety regulations for temperature control devices.
